*January 12 -25, 2014*

## **January 12, 2014: Arrive in Cali**

We had some staggered arrivals on Day 1 of the tour which gave time for folks to settle down and prepare for our upcoming adventure. The second group to arrive (Thomason's and Mcneely's) got a little bit of luck as we spotted a Common Potoo roosting right above our van at the airport, great first bird for some of the group! Everyone got to mingle and meet, although some of us have travelled together in the past, and dinner at Crepes and Waffles was a great opportunity to catch up and learn about our new friends. Dinner was spectacular, and the group enjoyed learning that Colombia Birdwatch supports this establishment as 100% of their workforce is composed single moms that are heads of the family. After a decadent dessert, we headed to the hotel to prepare for our ascent up the western Andes for our first full day of birding.

*The Group at Finca La Arucana*

**January 13, 2014: Finca La Araucana, Bichacue Yath and Andean Cock-of-the-rock Lek**

Our first full day of birding began at Finca La Araucana, where we were met by 3 individuals of Smoky-brown Woodpecker, American Redstart, Blue-black Grassquit and a Squirrel Cuckoo flying around us. The “guadua” (bamboo) greenhouses provided an entertaining show of a family of Spectacled Parrotlets, and it was nice to be received by Alvaro Calonje with some coffee and tea on the balcony. The show started with Crimson-rumped Toucanet and a myriad of tanagers, including Summer, Scrub, Flame-rumped, Golden, Hepatic and Fawn-breasted. A flowering “guayacan” tree, with its impressive yellow flowers, attracted Rusty Flowerpiercer and an impressive amount of hummingbirds that included Long-billed Starthroat, Black-throated Mango, White-necked Jacobin, and Western and Andean Hummingbirds. A very productive morning ended with a lunch consisting of a “tamal” on the canopy terrace of

*Red-headed Barbet (female)*

the Bichacue Yath reserve, where we were blessed with incredible views of the endemic Colombian Chachalaca.

The excitement in the air was felt by everyone, and it was no secret that we were all very eager to get to El Pato, bordering the Farallones National Park. We arrived at Jaime Certuche’s place, where he greeted us and shared his story with the group. An avid hunter, Jaime changed his ways recently and now considers himself a conservationist, caring for an active Andean Cock-of-the-rock Lek on his prop-

*Green Honeycreeper (male)*

*Saffron-crowned Tanager*

erty that he graciously allowed us to visit. A life bird for half of the group, 6 individuals entertained us for a few hours, making the steep but short hike worth our while. Content, we enjoyed some organic coffee and fried bread offered by our hosts before heading to the hotel in Km 18 for a nice dinner and rest.

### **January 14, 2014: Anchicaya**

The first birds of the day were Torrent Tyrannulet and Yellow-faced Grassquit just outside El Queremal. As we descended the western slope of the western Andes in the Anchicaya region, our first stop yielded Glistening-green Tanager and excellent views of Brown-billed Scythebill. A superb day for hummingbirds, we were able to add Green Thorntail, Empress Brilliant, Purple-bibbed Whitetip, Booted Rackettail, Violet-tailed Sylph, Green-crowned Woodnymph, and Greenish Puffleg to the list. The group certainly enjoyed the very handsome Ornate Flycatcher, and Orange-bellied Euphonia was certainly a crowd-pleaser.

We arrived at "El Descanso" (The Rest Stop) and met Doña Dora and her grandson Josman, a young birder who was as excited as can be to receive his first pair of binoculars, a thoughtful gift by Jim and Linda Thomason. A small colony of Chestnut-headed Oropendolas nests near the house, so we enjoyed these before we set out on a short walk as the activity at the feeders was low. We enjoyed great views of Bat Falcon, Lemon-rumped Tanager and Silver-throated Tanager before lunch. A delectable lunch was followed by an hour of rest and before some great afternoon birding. Most notably we saw Red-headed Barbet, Black-billed Peppershrike, and Rufous-throated Tanager before a light rain had us in the van and on the way to the hotel for a nice dinner, list-making and rest.

### **January 15, 2014: El 18**

We started the day walking along the road close to the Hotel where birding is very productive. We heard many birds like the endemic Chestnut

*Y Blue-winged Mountain-tanager*

*Green Thorntail*

*Silver-throated Tanager*

Wood-quail, Russet-crowned Warbler and others. Suddenly the birds began to appear and we had views of Streak-capped Treehunter, Scaly-naped Parrot and the first view of the special and endemic Multicolored Tanager.

Afterwards we took the road to The Raul's Place "the hummer's paradise". Just after getting off the van we started to enjoy the plethora of hummingbirds and tanagers visiting the feeders, the experience with the hummers was very close and the photographers were especially excited. Our trip list began to grow; Long-tailed Sylph, Brown Viole-

tear, Buff-tailed coronet, Purple-throated Woodstart, White-necked Jacobin, amongst other hummingbirds. Tanagers included Saffron-crowned, Golden, Golden-naped, Black-capped, and Blue-winged Mountain-Tanager. Of course, Red-headed Barbet showed off for us before we began our hike along the road from Raul's place. The activity was hectic, everyone commenting on what an amazing time they were having. Some of the specialties we saw included Yellow-vented Woodpecker, Green-and-black Fruiteater, a very special and close view of Tawny-bellied Hermit eating insects, and the amazing Col-

*The crew riding the "brujitas"*

*Black-breasted Puffbird*

lared. The highlight of the day was most definitely views of a pair of Golden-headed Quetzal building a nest. The female and the male gave us a solemn nature show, On our way back to lunch the rare Scaled Fruiteater made an appearance, and the group had a very pleasant Tapaculo experience, in this case with the near endemic Nariño Tapaculo.

After lunch we walked along the same road seeing similar birds, adding specialties such as Olive-backed Woodcreeper, Golden-winged Manakin, we had again another special experience with the Quetzal and better views of the endemic and vulnerable Multicolored Tanager. We went back to the Hotel to have an early dinner and prepare for our early morning departure down the western slope of the western Andes towards San Cipriano, in the Pacific

Region.

### **January 16, 2014: San Cipriano**

The day began very early, we left well before sunrise to allow for travel time to San Cipriano. We definitely enjoyed the ride into town, and invention by the locals that make great use of the railroad. The “brujitas” consist of wooden carts propelled by motorcycles. After the exhilarating and fun ride we crossed the small town and began seeing birds of the Colombian lowlands, including Chestnut-headed Oropendola, Tawny-crested and Dusky-faced Tanagers, and Chestnut-mandible Toucan. The day was overcast and very dark, almost ominous. As it started to drizzle, we found some shelter and arrived just in time, as an excellent mixed flock was coming through.

Special birds feeding in this flock included the near endemic Blue-whiskered Tanager, Cinnamon Becard, Cinnamon Woodpecker, Black-checked Woodpecker, Masked Tityra, Black-tipped Cotinga. A very special Woodcreeper the appeared in the scene, this one was the Black-striped Woodcreeper, a lifer for Jose. Other birds worth mentioning include White-tailed Trogon and Choco Toucan.

Birding along the road in the road we saw the uncommon Black-breasted Puffbird, Western-slaty Antshrike, and of course we did not miss the opportunity to see the natural swimming pools at the Escalerete River. Finishing the morning we saw Choco Toucan and Blue Dacnis before we had a delectable lunch consisting of fried fish and fish sancocho. We then drove over the Western Andes to the Cauca Valley, and had a very pleasant dinner at the hotel in Buga.

### **January 17, 2014: Sonso Lagoon**

We arrived at sunrise at the Sonso Lagoon and were

*Endemic Apical Flycatcher*

*The Very Local Comb Duck*

received by the spectacular Cocoli Heron, and the sunrise was beautiful with nice birds as Yellow Oriole, Ringed Kingfisher, and White-tailed Kite. Bob spotted an easy bird to hear but not to see, Striped Cuckoo. A nice Osprey then flew overhead with a big fish, and we focused our attention on the banks of the Cauca River. Lesser and Greater Yellow-legs, Black-bellied Whistling-duck, Greater Ani, and Amazon Kingfisher made an appearance. After this nice spot on the road we headed toward the reserve entrance, but a man riding a bicycle talked to us about a flooded corn plantation that had just been cut, teeming with birds.

We trusted the man, our birders instinct playing a bit into this, and headed towards the field. What an amazing place to see wetland birds! We saw Purple Gallinule, Wattled Jacana, Snail Kite, but a surprise was waiting for all of us. We scanned the wetland that was teeming with common birds such as Glossy Ibis and many Great Egrets. And the surprise of the day was a rare, localized and gorgeous bird: Comb Duck. A lifer for all of us!

The rest of the morning brought many specialties of the Sonso lagoon, including Jet Antbird, Lineated Woodpecker, Fulvous Whistling-duck, and Limpkin. Our last stop of the morning was at the reserve entrance, where we saw the endemic Apical Flycatcher, Piratic Flycatcher, closed views of Lesser Night-hawk, and fun shows of nesting Spectacled Parrotlet. We left Sonso Lagoon with, and on our way out made one more stop with Dario, the ranger of the reserve. Excellent views of Common Potoo were had by all.

We had rest at the hotel, and time to enjoy the swimming pool before feasting on Sancocho, a typical lunch of the Cauca Valley Area. We headed towards Pereira, crossing the Cauca Valley and making our way up the central Andes. We crossed the city and arrived at the Otun River with perfect light to search for Torrent Duck, unsuccessfully. As we arrived at the lodge and sunset we saw Cauca Guan, an endemic and endangered species which was rediscovered in 1990. We had a tasty dinner and everyone tried the "pitaya", a singular fruit that Scott

bought to give to the group as a dessert.

### **January 18, 2014: Otun-Quimbaya**

We started the morning birding around the lodge where we saw several species such as Flame-rumped Tanager, Red-ruffed Fruitcrow one of our target birds. Other good birds included Swainsons Thrush and the uncommon Speckled-faced Parrot. We had breakfast and went on a search for Torrent Duck, which everyone was hoping to see. On our way we had very good views of a single Howler Monkey, but our first stop at a bridge over the Otun River was unsuccessful for the duck. We met Fraybel, who graciously invited us into his home, and we even got a nice concert by his son Bryan playing Andean

music on the flute. We had some delicious organic coffee, stopping for one more try at Torrent Duck at a broken bridge. The space was tight, but we somehow managed to get the entire group situated so we all got a good luck at both the male and female. Very content, we returned to the lodge for lunch and some down time before afternoon birding. The afternoon brought a few more views of Multicolored Tanager and the highlight was most definitely a female Andean Cock-of-the-rock and close up views of Cauca Guan.

### **January 19, 2014: Otun-Quimbaya and drive to Rio Blanco**

The day started having great views from the lodge of Speckled-faced Parrot eating “aguacatillo” fruits. We then birded a trail through the forest where we had very nice views of Green Jay. We then took the road to Pez Fresco and where able to get good looks of White-naped Brush-finch, Emerald Toucanet, Highland Motmot, and close to the river Torrent Tyrannulet and Golden-crowned Flycatcher.

We took an early lunch and headed towards Manizales and the Rio Blanco Reserve, watching for Torrent Duck along the Otun River. One stop along the river yielded incredible views of 2 male Torrent Duck (one juvenile), with an epic view of a female a few hundred yards downstream. We said our good-byes to Mary and Scott in Pereira and made a brief stop at El Lago which yielded Least Grebe, and some delicious homemade ice cream along the road to help with the heat. In Manizales we did a short city tour taking “the Gondola”, a type of transport of this city where we had good views of Manizales. We cruised the downtown area enjoying the city sights, trying some different street food, and then made our way up to Rio Blanco. We had “Ajiaco” for dinner, a typical Andean dish made with three types of

potatoes and chicken and garnished with capers and cream. There was much excitement in the air dreaming about the Antpittas that were to come the next day.

#### **January 20, 2014: Rio Blanco Reserve**

The morning started off fabulously, just around the lodge we saw one of the target birds for the trip, the uncommon Masked Saltator provided us a show as an individual gathered nesting material and transported it to the next. At the same time were rewarded with views of the near endemic Rusty-faced Parrot and the noisy Black-collared Jay. We could hardly contain ourselves as we hiked up the hill towards the first of 3 antpitta feeders, which proved to be quite productive. Within a couple of hours we have had amazingly close-up views of Brown-banded, Chestnut-crowned, Bicolored, Slate-headed, and Chestnut-naped Antpittas. Another lifer for Jose, near the feeders we saw White-capped Tanager, which enchanted us with its great colors. A mixed flock quickly swept by, affording views of species such as Black-eared and Superciliated Hemispingus, Pearled Treerunner, Golden-fronted Whitestart and Crimson-mantled Woodpecker. The photographers in the group cer-

tainly enjoyed Masked Trogon, and a few folks in the group saw Undulated Antpitta crossing the wide trail. Other birds we saw this morning included Blue-and-black Tanager, Grass-green Tanager, and Andean Guan.

Before lunch we tried unsuccessfully for Blackish Tapaculo, and then enjoyed some tasty beans for lunch and had some time for a siesta. The afternoon was less productive than the morning; we had great views of Blue-and-black Tanager, Emerald Toucanet, and views of the landscape of Caldas area around Rio Blanco Preserve.

### **January 21, 2014: Rio Blanco and drive to Termas del Otoño**

We devoted the morning to look for Tapaculos and other target birds we were missing. We tried first

for Black-billed Mountain-toucan which we saw in the morning, and had great views of this one before noon. Birding in the forest was productive, we saw some birds we were missing such as Ash-colored Tapaculo, Rufous-headed Pygmy-Tyrant, Green-and-black Fruiteater, Sickle-winged Guan, Andean Guan. And finishing the morning we had an excellent mixed flock where we saw Tawny-bellied Hermit, Wedge-billed Hummingbird, Capped Conebill, Mountain Cacique, and Black-capped Hemispingus.

After lunch we said goodbye to our splendid staff. Albeiro and Celene, and we started walking down the road. We then heard a loud drumming in the forest which was the big and pretty Powerful Woodpecker, male and female gave us a great show. We then spotted red and yellow in the canopy and it was Red-hooded Tanager, another target we were missing.

*Bearded Helmetcrest*

We then had nice views of Highland Motmot, and the amazing Golden-plumed Parakeet eating seeds in the canopy over us was a nice way to say goodbye to Rio Blanco.

We went to Los Termales Del Otono, the hotel where we spent the night, and celebrated Linda's birthday before going to bed early to prepare for our ascent to Los Nevados National Park.

### **January 22: Los Nevados National Park**

All of were very excited for this day, and the amazing sunrise was a premonition of a very good day. We started birding the lower elevations before ascending, and saw birds such as Plumbeus Sierra-finch and Paramo and Plain-colored Seedeaters. We continued ascending and at the next birding stop we saw Glossy Flowerpiercer, Golden-breasted Puffleg,

Viridian Metaltail, Scarlett-bellied Mountain-tanager, Black-back Bush-tanager and Black-chested Buz-zard-eagle. At he end of the road we had incredibly close-up views of Bearded Helmetcrest, a special hummingbird that was a target for the trip. We then saw Tawny Antpitta a funny and friendly Antpitta. We had "trucha" (trout) for lunch at almost 4,000 meters with the idea to bird during our descent. This plan proved to be quite a stellar plan, as the afternoon yielded most of the targets we had left to see. The fog cleared, and at Laguna Negra, a glacial lake along the road, we saw Andean Teal, Andean-tit Spinetail and Sedge Wren. So many highlihts during an incredible day of birding, and the afternoon brought more. Hard to decide what the bird of the day was, as we saw many special birds on our last stop, including Rainbow-bearded Thornbill, Great

*Pale-naped Brush-finch*

Saphirewing, Shining Sunbeam, Blue-back Conebill and the enigmatic, vulnerable and Endemic Rufous-fronted Parakeet.

After an epic day of birding at high elevations, we returned to the hotel for a nice soak in the hotsprings and a lovely meal.

#### **January 24: Drive to Cali**

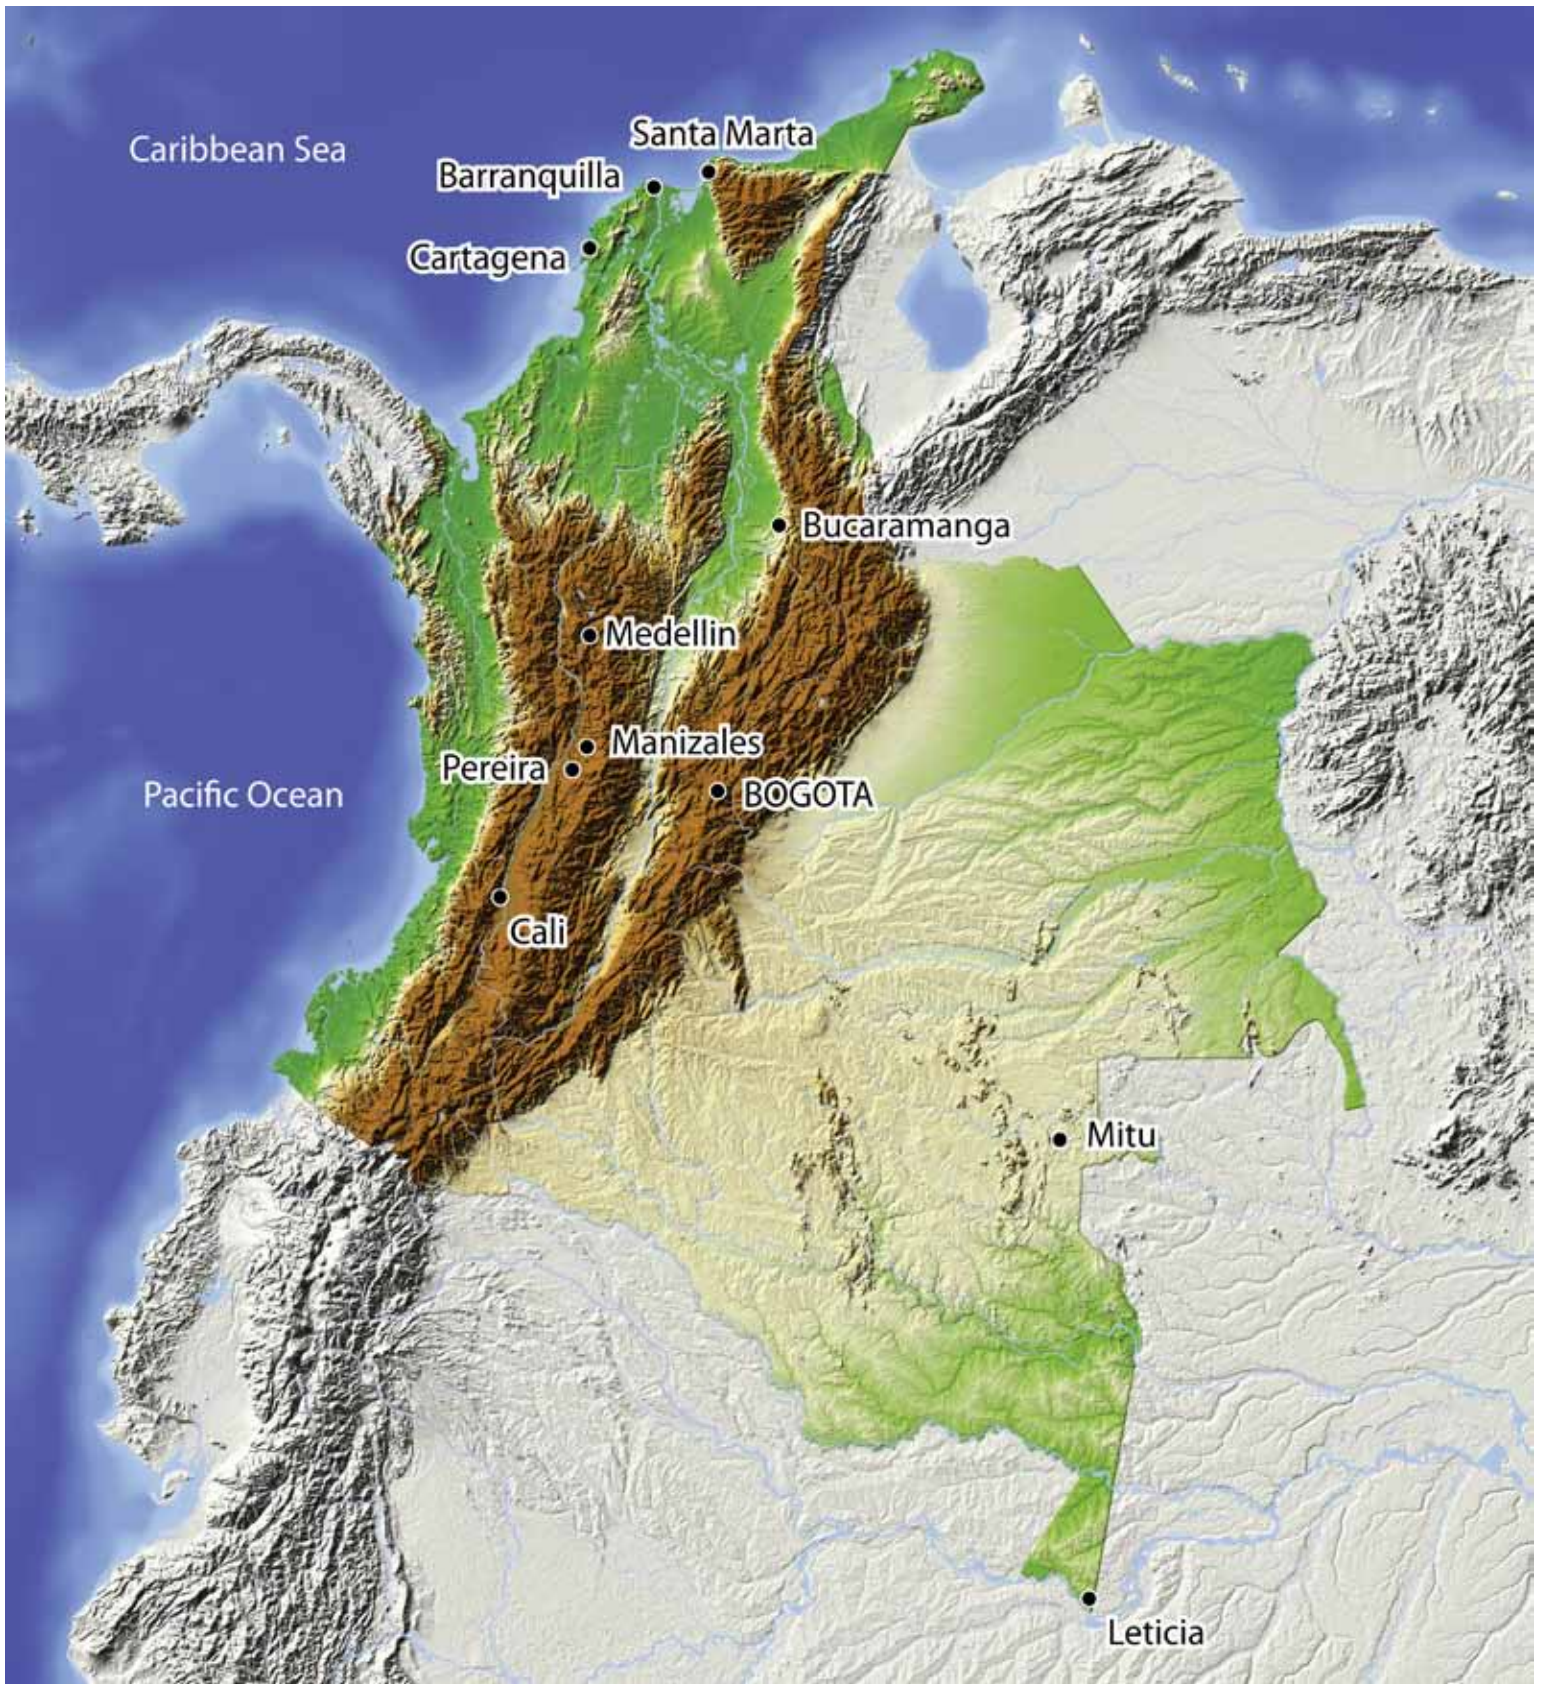

We did not bird much this day as it was a travel day, but we did stop for lunch near Sonso Lagoon for a chance at Grayish Piculet, which did not appear but we added Mouse-colored Tyrannulet to our trip list. We arrived in Cali in time to have a few hours to relax before going out for pizza and visiting the San Antonio neighborhood, to the Loma de la Cruz park

to enjoy some Andean music and dancing.

#### **January 25, 2014: Cristo Rey and Dolmetsch Arboretum**

The group had time to enjoy the morning exploring the area near the hotel before heading up to Cristo Rey for nice views of the city. We had the pleasure of having Uber's son with us, and enjoyed the roadside art on the way up the mountain.

For lunch we met Alvaro Calonje at the Dolmetsch Arboretum, and boy was it a nice lunch. The wine flowed as stories were told and a healthy variety of food was enjoyed by all. The afternoon came with a private tour of the gardens, a perfect prelude to a farewell dinner along the Cali River.

# Complete Tour List Seen and Heard Species

Black-bellied Whistling-Duck

Fulvous Whistling-Duck

Comb Duck

Torrent Duck

Andean Emerald	Streaked Tuftedcheek	Torrent Tyrannulet
Steely-vented Hummingbird	Linneated Foliage-gleaner	Mouse-colored Tyrannulet
Long-billed Starthroat	Streaked Xenops	Golden-faced Tyrannulet
Great Sapphirewing	Black-striped Woodcreeper	Variiegated Bristle-Tyrant
Golden-headed Quetzal	Strong-billed Woodcreeper	Marble-faced Bristle-tyrant
Collared Trogon	Olive-backed Woodcreeper	Ornate Flycatcher
White-tailed Trogon	Streak-headed Woodcreeper	Scale-crested Pygmy-Tyrant
Masked Trogon	Montane Woodcreeper	Rufous-headed Pygmy-tyrant
Ringed Kingfisher	Brown-billed Scythebill	Rufous-crowned Tody-Flycatcher
Amazon Kingfisher	Bar-crested Antshrike	Slate-headed Tody-flycatcher
Highland Motmot	Western Slaty-Antshrike	Common Tody-Flycatcher
Black-breasted Puffbird	Uniform Antshrike	Cinnamon Flycatcher
Red-headed Barbet	Long-tailed Antbird	Smoke-colored Pewee
Five-colored Barbet	Jet Antbird	Black Phoebe
Toucan Barbet	Chestnut-backed Antbird	Vermilion Flycatcher
Chestnut-mandibled Toucan	Chestnut-crowned Antpitta	Brown-backed Chat-Tyrant
Emerald Toucanet	Bicolored Antpitta	Cattle Tyrant
Choco Toucan	Chestnut-naped Antpitta	Rusty-margined Flycatcher
Crimson-rumped Toucanet	Rufous Antpitta	Great Kiskadee
Black-billed Mountain-Toucan	Tawny Antpitta	Golden-crowned Flycatcher
Greyish Piculet	Brown-banded Antpitta	Streaked Flycatcher
Acorn Woodpecker	Undulated Antpitta	Tropical Kingbird
Black-cheeked Woodpecker	Thicket Antpitta	Apical Flycatcher
Red-crowned Woodpecker	Slate-crowned Antpitta	Pale-edged Flycatcher
Smoky-brown Woodpecker	Ocellated Tapaculo	Bright-rumped Attila
Yellow-vented Woodpecker	Ash-colored Tapaculo	Green-and-black Fruiteater
Golden-olive Woodpecker	Blackish Tapaculo	Scaled Fruiteater
Crimson-mantled Woodpecker	Choco Tapaculo	Andean Cock-of-the-rock
Lineated Woodpecker	Nariño Tapaculo	Red-ruffed Fruitcrow
Cinnamon Woodpecker	Spillmann's Tapaculo	Black-tipped Cotinga
Powerful Woodpecker	Alto-pisones Tapaculo	Golden-winged Manakin
Stout-billed Cinclodes	Paramo Tapaculo	Yellow-bearded Manakin
Andean Tit-Spinetail	Yellow-bellied Elaenia	Masked Tityra
Azara's Spinetail	Mountain Elaenia	Barred Becard
Red-faced Spinetail	White-tailed Tyrannulet	Cinnamon Becard
Pearled Treerunner	White-throated Tyrannulet	Black-billed Peppershrike

Brown-capped Vireo	Scarlet-bellied Mountain-Tanager	Saffron Finch
Black-collared Jay	Blue-winged Mountain-Tanager	Blue-black Grassquit
Green Jay	Grass-green Tanager	Slate-colored Seedeater
Blue-and-white Swallow	Golden-crowned Tanager	Ruddy-breasted Seedeater
Brown-bellied Swallow	Fawn-breasted Tanager	Yellow-bellied Seedeater
Southern Rough-winged Swallow	Glistening-green Tanager	Plain-colored Seedeater
Barn Swallow	Multicolored Tanager	Paramo Seedeater
House Wren	Golden-naped Tanager	Chestnut-capped Brush-Finch
Sedge Wren	Black-capped Tanager	Stripe-headed Brush-Finch
Whiskered Wren	Scrub Tanager	White-naped Brush-finch
Bay Wren	Blue-necked Tanager	Pale-naped Brush-Finch
Sharpe's Wren	Rufous-throated Tanager	Slaty Brush-Finch
Gray-breasted Wood-Wren	Blue-and-black Tanager	Ashy-throated Bush-Tanager
Chestnut-breasted Wren	Beryl-spangled Tanager	Hepatic Tanager
White-capped Dipper	Metallic-green Tanager	Summer Tanager
Andean Solitaire	Saffron-crowned Tanager	Red-hooded Tanager
Orange-billed Nightingale-Thrush	Blue-whiskered Tanager	Tropical Parula
Swainson's Thrush	Golden Tanager	Blackburnian Warbler
Black-billed Thrush	Silver-throated Tanager	American Redstart
Great Thrush	Blue Dacnis	Black-and-white Warbler
Tropical Mockingbird	Green Honeycreeper	Mourning Warbler
Red-capped Cardinal	Blue-backed Conebill	Canada Warbler
White-capped Tanager	Capped Conebill	Slate-throated Redstart
Black-capped Hemispingus	Glossy Flowerpiercer	Golden-fronted Redstart
Superciliaried Hemispingus	Masked Flowerpiercer	Russet-crowned Warbler
Oleaginous Hemispingus	Rusty Flowerpiercer	Three-striped Warbler
Black-eared Hemispingus	White-sided Flowerpiercer	Chestnut-headed Oropendola
Gray-hooded Bush-tanager	Black-backed Bush-Tanager	Mountain Cacique
Tawny-crested Tanager	Dusky-faced Tanager	Yellow-backed Oriole
White-lined Tanager	Bananaquit	Yellow Oriole
Flame-rumped Tanager	Yellow-faced Grassquit	Shiny Cowbird
Lemon-rumped Tanager	Black-winged Saltator	Lesser Goldfinch
Blue-grey Tanager	Streaked Saltator	Thick-billed Euphonia
Palm Tanager	Masked Saltator	Orange-bellied Euphonia
Blue-capped Tanager	Rufous-collared Sparrow	Blue-naped Chlorophonia
Lachrymose Mountain-Tanager	Plumbeous Sierra-Finch
